Acupuncture and Pain Management Alternatives

for Veteran Clients with Physical Symptoms of PTSD and Chronic Pain

December 16

11:00am-1:00pm EST

Presented by:

• Dr. Adriane Dourte,
B.S., MTCM, DACM, Dipl. Ac

• Summary

The course will be about introducing alternative options for physical symptoms related to PTSD such as insomnia, nightmares, chronic pain, and fatigue. It will include detailed information on modalities to help manage these symptoms for better engagement in clinical services. The focus will be on using this information in conjunction with other medical models as opposed to instead of.

For more information, contact:

Georgie Koppermann, National Veteran Services Coordinator

• Objectives

1. To learn about holistic alternative options for managing physical symptoms related to PTSD and chronic pain
2. To identify and understand the role of the modalities in the overall healing process
3. Ultimately have new information and practices to add to your “toolbox” for enhancing clinical experiences for clients with PTSD and chronic pain
